Galen Egan

galen.egan@sofarocean.com ⋄ (805) 223-0037

EDUCATION

Ph.D., Civil & Environmental Engineering — June 2020
Environmental Fluid Mechanics & Hydrology
Stanford University, Stanford, CA

M.S., Civil & Environmental Engineering — June 2016
Environmental Fluid Mechanics & Hydrology
Stanford University, Stanford, CA

B.S., Civil Engineering | *magna cum laude* — June 2015
Environmental & Water Resources Engineering
UCLA, Los Angeles, CA

EXPERIENCE

Maritime Data Scientist, Sofar Ocean — 02/2021–present
Supervisor: Pieter Smit
Responsible for processing and analyzing data from Sofar's distributed network of Spotter wave buoys for modeling applications; developing optimization algorithms for Wayfinder, Sofar's vessel routing application.

Postdoctoral researcher, Stanford University — 06/2020–12/2020
Bob & Norma Street Environmental Fluid Mechanics Lab
Advisor: Prof. Oliver Fringer
Improved parameterization schemes for numerical sediment transport models based on results from field data collected in San Francisco Bay.

On-call scientist, Integral Consulting Inc. — 08/2019–02/2021
Supervisor: Grace Chang
Provided data analysis and field work support for Integral's Marine Science & Engineering department. Example work included a baseline condition assessment for a potential sediment remediation site.

Graduate researcher, Stanford University — 06/2016–06/2020
Bob & Norma Street Environmental Fluid Mechanics Lab
Advisor: Prof. Stephen Monismith
Thesis: *Waves, turbulence, mud, and worms: sediment transport and boundary layer dynamics in an estuary*
Led three field deployments in San Francisco Bay with novel instrumentation designed to investigate boundary layer turbulence and sediment transport. Additional projects include hydrodynamic modeling of stratified turbulence in a tidal river, and running laboratory experiments to quantify the mixing of brine discharge from desalination plants.

Undergraduate researcher, UCLA — 01/2013–06/2015
Laboratory for the Chemistry of Construction Materials
Advisor: Prof. Gaurav Sant
Investigated the mechanical and transport properties of low-CO_2 footprint concretes for civil infrastructure applications. Designed and conducted multi-year experiments studying the effects of aggregate inclusion on moisture transport and drying shrinkage in cement composites.

PEER REVIEWED PUBLICATIONS

Egan, G., Chang, G., Manning, A., Monismith, S., & Fringer, O. (2022 *in revision*) On the variability of flocculated particle characteristics in a shallow estuary.

Chang, G., **Egan, G.**, McNeil, J. D., McWilliams, S., Jones, C., Spada, F., Monismith, S., & Fringer, O. (2021). Seasonal particle responses to near-bed shear stress in a shallow, wave-and current-driven environment. *Limnology and Oceanography Letters*.

Cowherd, M., **Egan, G.**, Monismith, S., & Fringer, O. (2021). Phase-resolved wave boundary layer dynamics in a shallow estuary. *Geophysical Research Letters 48*(8), e2020GL092251.

Roberts, D.C., **Egan, G.**, Forrest, A.L., Largier, J.L., Bombardelli, F.A., Laval, B.E., Monismith, S.G., Schladow, S.G. (2021). The setup and relaxation of spring upwelling in a deep, rotationally influenced lake. *Limnology & Oceanography 66*(4), 1168-1189.

Egan, G., Chang, G., McWilliams, S., Revelas, G., Fringer, O., & Monismith, S. (2020). Cohesive sediment erosion in a combined wave-current boundary layer. *Journal of Geophysical Research: Oceans*, e2020JC016655.

Egan, G., Manning, A., Chang, G., Fringer, O., & Monismith, S. (2020). Sediment-induced stratification in an estuarine bottom boundary layer. *Journal of Geophysical Research: Oceans 125*, e2019JC016022.

Egan, G., Chang, G., Revelas, G., Monismith, S., & Fringer, O. (2020). Bottom drag varies seasonally with biological roughness. *Geophysical Research Letters 47*(15), e2020GL088425.

Egan, G., Cowherd, M., Fringer, O., & Monismith, S. (2019). Observations of near-bed shear stress in a shallow, wave- and current-driven flow. *Journal of Geophysical Research: Oceans 124*(8), 6323-6344.

Monismith, S.G., Hirsh, H., Batista, N., Francis, H., **Egan, G.**, & Dunbar, R.B. (2019). Flow and drag in a seagrass bed. *Journal of Geophysical Research: Oceans 124*(3), 2153-2163.

Hogg, C. A., **Egan, G.**, Ouellette, N. T., & Koseff, J. R. (2018). Shoaling internal waves may reduce gravity current transport. *Environmental Fluid Mechanics 18*(2), 383-394.

Egan, G., Kumar, A., Neithalath, N., & Sant, G. (2017). Re-examining the influence of the inclusion characteristics on the drying shrinkage of cementitious composites. *Construction and Building Materials 146*, 713-722.

INVITED TALKS

"The bottom boundary layer in San Francisco Bay: waves, turbulence, mud, and worms." Coastal Ocean Fluid Dynamics Laboratory Talk, September 2019, Woods Hole, MA

"What we learned from three muddy field deployments in San Francisco Bay." Integral Consulting Marine Science and Engineering Webinar, May 2019, Santa Cruz, CA

"Cohesive sediment and the friction velocity." Stanford Environmental Fluid Mechanics Laboratory Seminar, April 2019, Stanford, CA

"Stratification and turbulence in a tidal river: observations and 1D modeling." Stanford Environmental Fluid Mechanics Laboratory Seminar, September 2017, Stanford, CA

CONFERENCES

TEACHING

CEE 262H: Observational Methods in Coastal Oceanography, Stanford University Spring 2020
Co-instructor: prepared and gave lectures related to turbulence and sediment measurements and data analysis in coastal environments.

CEE 262B: Transport and Mixing in Surface Water Flows, Stanford University Winter 2017, 2018
Teaching assistant: prepared and taught lessons for weekly supplementary class session, held office hours, and graded assignments.

OSPGEN 53: Corals of Palau, Stanford/Bing Overseas Program Summer 2017
Teaching assistant: Prior to the course, coordinated shipping and programming all of scientific instruments used for three week summer course in Palau. During the course, helped mentor student research projects, coordinated field excursions, and directed student life abroad.

CEE 101B: Mechanics of Fluids, Stanford University Fall 2016
Teaching assistant: held weekly office hours and review sessions, set up and assisted with the laboratory portion of the course.

CEE 201S: Computations in CEE, Stanford University Summer 2016
Teaching assistant: held weekly office hours, graded assignments, and led supplemental discussion section for a MATLAB-based programming class. Taught to a wide audience, from high school seniors to Stanford Continuing Studies students.

AWARDS & CERTIFICATIONS

Centennial Teaching Assistant Award Recipient	2018
Outstanding Student Presentation Award, AGU Fall Meeting	2018
Charles H. Leavell Graduate Student Fellowship	2017–2018
John K. Vennard Fellowship	2015–2016
California EIT #157339	2016

RELEVANT SKILLS AND SOFTWARE

Advanced: Python (including Keras, PyTorch, sklearn, NumPy, SciPy, pandas, cvxpy), MATLAB, LaTeX

Proficient: C++, Rust, Fortran, SQL, git, ArcGIS, AutoCAD Civil3D

MENTORING, SERVICE, & OUTREACH

Undergraduate research mentor 2018–present
Mentoring an undergraduate (now MS) researcher. Trained in field work and data analysis, and held weekly meetings for honors thesis project.
For reference, contact Marianne Cowherd at mcowherd@stanford.edu

Undergraduate research mentor 2018–2019
Assisted an undergraduate researcher with her honors thesis, which won the Firestone Medal for Excellence in Undergraduate Research.
For reference, contact Sienna White at siennarwhite@gmail.com

Stanford CEE Graduate Life Committee Environmental Engineering Representative 2017–2019
Planned and led quarterly town hall meetings to gain insight into problems experienced by graduate students in CEE, including issues related to diversity and inclusion, advisor relationships, and admissions procedures.

Stanford EnvEng Student Committee Representative 2017–2019
Organized activities, mentorship programs, and new admit visit day for students in the EnvEng sub-department.

National Ocean Sciences Bowl Volunteer - Stanford, CA 2017
Assisted with judging and logistics for Ocean Sciences quiz bowl for local high school students.
